

Marquee Flooring

A Guide to Options

The floor of your marquee is vital. Every chair and table has to sit steadily on it; every footstep and dance step has to be taken with confidence. The floor has to be level, even, strong, safe and fit for the purpose you choose. At Tents and Events we have flooring available to suit most sites

Flooring Quick Guide

Ground Type	Floor Type
Smooth, level or very slight slope	Direct Lay
Uneven or medium slope	Suspended - Steel Sub
	Suspended - Cassette
Large slope or obstacles	Floorstak (12m, 15m only)

Direct Lay Flooring

A simple and efficient floor for flat sites. This is the most cost effective and affordable flooring for level ground thus the direct lay floor is a popular choice for marquees on flat level sites with easy access

Features and Benefits

- ✓ Sits directly on the ground
- ✓ Attractively finished in varnished pine with light oak stain
- ✓ No further covering needed
- ✓ Manufactured in house by Tents and Events
- ✓ Cost Effective
- ✓ Quick to install and dismantle

Suspended Flooring

Steel Sub Base Floor - Up to 9m Structures

This floor consists of a steel frame which is levelled at strategic points. This forms a very rigid and secure base for the marquee which is erected onto brackets which are part of the floor system

Features and Benefits

- ✓ Ideal for uneven sites
- ✓ Small undulations can be smoothed out with packers
- ✓ High quality finish in varnished pine
- ✓ No further covering needed but is suitable for carpeting if required
- ✓ Steps and ramps can be built for access

Cassette Flooring including Floorstak

Supplied by our German manufacturer this system consists of floor modules (cassettes) that are laid on aluminium beams. The high standard of engineering means that it can offer a solution to the most challenging of sites

Features and Benefits

- ✓ Ideal for uneven sites
- ✓ Ideal for ground not suitable for pinning
- ✓ Floorstak allows build of up to 2m above ground
- ✓ Can span obstacles e.g. flower beds, small fountains etc.
- ✓ Additional weights can be inserted cassette flooring channels to give extra ballast
- ✓ No further covering needed but is suitable for carpeting if required
- ✓ Steps and ramps can be built for access
