A guide to

Marquee Solid Glazing

Tents and Events

Solid Glazing: the special touch

Maximise the views at your event location with marquee solid glazing. Our glazing options suit marquees that are built on flat, level ground. Glazing is typically used in conjunction with our suspended floor systems to ensure optimal stability and allow a seamless connection between the festivities inside and the beauty outside.

For any occasion

Corporate days

On land and sea we can design the right marquee for you.

Festivals

Add extra space to function areas for guests and stalls.

Weddings

Enjoy romantic landscapes on your special day.

12m and 15m Solid Glazing

Our larger marquees have a 3 metre eaves height providing a spacious interior. Full height windows with opening panels make the most of the fabulous panoramic views.

- Sturdy construction suitable for windy or exposed sites
- Works with both suspended floor options
- Quicker water shedding in wet environment for clearer views
- Higher quality finish than with PVC walls
- Opening panes on larger panels (5m) for natural ventilation
- Glass balustrades compatible with canopy roof extensions

Selecting your Solid Glazing

Use our marquee quick guide to select the solid glazing type to suit your event and contact us with any questions.

Marquee Size

Solid Glass Style
